INVENTORS: T. Paul Smith, Charles E. Dubois, David A. Leighty, and Erik M. Anhorn

TITLE: METHOD AND APPARATUS FOR TREATING BREATHING GASES

ABSTRACT

5       A method of making thin-walled permeable tubing using air blown extrusion, and of using the tubing in a device which enables a substantial humidification or drying of patient breathing gases in the breathing lines for patient monitoring or anesthesia results in cost savings and increased efficiency.
